

[Removing Apps From Mac Desktop](#)

[Removing Apps From Mac Desktop](#)

Installing a new application on Mac is such a simple task and even when you don't want it anymore, you can finally get rid of it by uninstalling it.. This might look simple and easy to note for, but some cases of uninstallation do not remove stubborn apps, or their leftover data as should have been.. Their tag along run in the system and takes over your precious space without letting you know.
